Test Report & Nutritional Interpretation

Report no. PNL-TR-0000 (sample) · Issue 1

Client	[Redacted]	**Report date**	DD Month YYYY
Sample	Complete dry food for adult dogs (extruded kibble)	**Sample ID**	PNL-S-0000-01
Batch / lot	[Redacted]	**Received**	DD Month YYYY, sealed, ambient
Target market	United States and India	**Analysis period**	DD–DD Month YYYY

1. Nutrient analysis (as fed)

Parameter	Method reference	Unit	Result	Declared	Assessment
Crude protein	AOAC 2001.11	%	26.4	min 25.0	**Pass**
Crude fat	AOAC 954.02	%	15.8	min 15.0	**Pass**
Crude fibre	AOAC 962.09	%	3.1	max 4.0	**Pass**
Moisture	AOAC 934.01	%	8.9	max 10.0	**Pass**
Ash	AOAC 942.05	%	7.2	—	Reported
Metabolizable energy (calc.)	Modified Atwater (AAFCO)	kcal/kg	3,618	3,600	**Within range**

2. Safety and quality

Parameter	Method reference	Unit	Result	Limit / guide	Assessment
Salmonella spp.	ISO 6579-1	per 25 g	Not detected	Not detected	**Pass**
Enterobacteriaceae	ISO 21528-2	cfu/g	<10	M = 300 (EU)	**Pass**
Total aflatoxins	HPLC-FLD	ppb	<2.0	20 (US FDA action level)	**Pass**
Water activity	ISO 18787	aw	0.52	≤0.65 (product spec)	**Pass**

3. Nutritionist interpretation

All guaranteed-analysis values meet the declared minimums and maximums, with protein and fat above minimum by margins consistent with normal analytical and batch variation. The calculated energy supports the declared calorie content. Safety results are within the limits of the target markets.

Recommendation: approve for release. For the Pet Food Label Modernization (PFLM) box, add total dietary fibre analysis to support the new dietary-fibre and carbohydrate declarations. Re-test after any change of protein or fat supplier.

4. Notes

Method references shown are typical examples and are confirmed per test in the agreed testing plan. Detection limits and measurement uncertainty are available on request. Analysis carried out through Guires Analytical Lab and qualified partner laboratories; interpretation by the Pet Nutrition Lab nutrition team.
